Art Unit: 3761

DETAILED ACTION

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Great Britain on August 13, 1998. It is noted, however, that applicant has not filed a certified copy of the British application as required by 35 U.S.C. 119(b).

Specification

Claim 19 is objected to because of the following informalities:

Claim 19 recites the limitation "the line of attachment" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

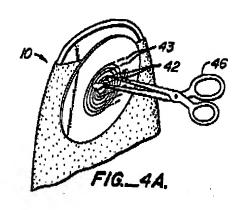

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 31 is rejected under 35 U.S.C. § 102(b) as being anticipated by Eastman (EP 0 231 508 A2).

Eastman teaches an ostomy pouch (10) comprising a pouch envelope (12) and an adhesive wafer (36) for securing the pouch envelope (12) to a person's skin, wherein the wafer cover layer (38) provided on the wafer (36), is provide with guidelines for enabling a person tom

Art Unit: 3761

cut the wafer (36) to a desired aperture size, the guidelines including at least one generally circular guideline (42), and at least one generally non-circular guideline (43), and the adhesive wafer (36) being secured to the envelope (12) around a closed line of attachment, that is, the outer perimeter of the pouch (see Fig. 4A, below).

Claim Rejections - 35 USC § 103

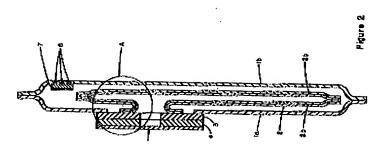

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

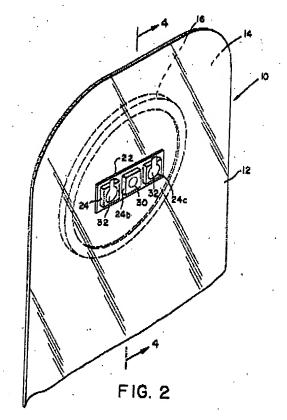

Claims 13-16, 18, 19, 21 and 26 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Smith et al. (US 5,591,144 A) in view of Leise, Jr. (US 4,938,750).

Regarding claim 13, Smith et al. teach an ostomy pouch comprising a first wall (2), provided with a comfort layer (1) and a flatus vent (6). Smith et al. expressly teach the claimed invention except for a sticker to cover the vent (see Fig. 2, below).

Art Unit: 3761

Leise, Jr. teaches an ostomy pouch (10) with adhesive stickers (32) for releasably closing a flatus vent (30)(see Fig. 2, below).

At the time of the invention, it would have been obvious to one of ordinary skill in the art to combine the vent closure means of Leis, Jr. with the drainage bag as taught by Smith *et al.* in order to provide control over the release of flatus from the bag (Leis, Jr. col. 4, line 64-col. 5, lines 8).

Art Unit: 3761

Regarding claim 14, Regarding claim 14, Leise Jr. teaches an outlet of the vent (30) defined by at least one segment of plastics material (22) and to which the adhesive sticker means (32) can adhere. Smith *et al.* teaches a outlet of the vent (6) positioned outside the comfort layer (1).

Regarding claim 15, Leis, Jr. teaches a plastics material (22) which has a smooth surface to which sticker means (32) can adhere.

Regarding claim 16, Leis, Jr. teaches a plastics material (22) which is substantially impermeable (col. 4, lines 20-26).

Regarding claim 18, Leis, Jr. teaches a plastics material (22) which is a cover over a filter (28), and is secured to the pouch around the filter (28).

Regarding claim 19, Leis, Jr. teaches a line of attachment which is continuous.

Regarding claim 21, Smith et al. teach a comfort layer (1) provided outside the majority of at least an upper portion of the pouch.

Claim 26 is rejected under 35 U.S.C. § 103(a) as being unpatentable over Smith *et al.* and Leis, Jr. as applied to claims 13-16, 18 and 21 above, and further in view of Eastman.

Smith et al. and Leis, Jr. teach the claimed invention except for their adhesive wafer being provided with guidelines.

Eastman teaches an ostomy adhesive wafer (36) with a cover (38) provided with circular and non-circular guidelines (42, 43) for enabling a person to cut the wafer (see Fig. 4A).

At the time of the invention, it would have been obvious to one of ordinary skill in the art to combine the indicia of Eastman with the drainage bag as taught by Smith et al. and Leis, Jr. in

Art Unit: 3761

order to provide a means for adjusting the size of the ostomy aperture (Eastman, page 16, line

27-page 17, line 11).

Allowable Subject Matter

Claims 17, 20 and 32 are objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

Claims 22, 23 and 27 are allowed.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Bogart whose telephone number is (703) 605-1184. The

examiner can normally be reached Monday-Friday.

In the event the examiner is not available, the examiner's supervisor, Weilun Lo may be

reached at phone number (703) 308-1957. The fax phone numbers for the organization where

this application or proceeding is assigned are (703) 305-3590 for regular communications and

(703) 306-4520 for informal communications.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 306-0858.

Michael Bogart
